

Week 01 Project Lab - Project Discovery & Planning

Start from: A website idea only; no project evidence or code structure exists.
Finish with: A documented project plan and repository scaffold ready for semantic HTML.

Lab Goal

Define the project problem, identify users/tasks, and structure the site architecture.

Build Tasks

1. Write a purpose statement
2. Create three user personas
3. Write five user stories with acceptance checks
4. Draw the sitemap and homepage wireframe
5. Create README.md and placeholder index.html

Key Code Reminder

```
# Morobe Discover
Week 01 creates planning evidence.

## Output
- Project brief
- User stories
- Sitemap
```

Testing Checklist

Check	Result
Open index.html in the browser	Pass / Fix needed
Check user stories include user, goal and reason	Pass / Fix needed
Confirm the sitemap matches the planned pages	Pass / Fix needed
Commit evidence to Git	Pass / Fix needed

Submit

- GitHub repository URL
- Week 01 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 02 converts the planned wireframe regions into HTML5 semantic page structure.
