

Week 02 Project Lab - HTML Foundation & Semantic Structure

Start from: Week 01 produced the sitemap, wireframe and repository scaffold.

Finish with: The homepage is coded as a meaningful HTML5 structure that reflects the wireframe.

Lab Goal

Create meaningful page regions and build web pages using appropriate structural elements.

Build Tasks

1. Create the HTML document shell
2. Add title and metadata
3. Translate wireframe regions into semantic elements
4. Add navigation links and headings
5. Add placeholder content for hero, cards and footer

Key Code Reminder

```
<header>
  <h1>Morobe Discover</h1>
</header>
<nav>...</nav>
<main>...</main>
<footer>...</footer>
```

Testing Checklist

Check	Result
Validate the document structure	Pass / Fix needed
Check one h1 per page	Pass / Fix needed
Check navigation links point to planned pages	Pass / Fix needed
Inspect the browser output	Pass / Fix needed

Submit

- GitHub repository URL
- Week 02 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 03 adds user data collection through forms and starts visual hierarchy rules.
