

Week 03 Project Lab - Forms & Visual Design Basics

Start from: Week 02 created a semantic homepage and page regions.

Finish with: The site includes a basic planning form and simple visual hierarchy through CSS.

Lab Goal

Implement user data collection and apply visual design principles to control user attention.

Build Tasks

1. Create the Plan a Trip form
2. Use labels and suitable input types
3. Add required fields and helpful placeholder text
4. Create basic CSS variables
5. Apply typography, colour and spacing

Key Code Reminder

```
<label for="visitorName">Your name</label>
<input id="visitorName" name="visitorName" type="text" required>
```

Testing Checklist

Check	Result
Try submitting an empty form	Pass / Fix needed
Check every input has a visible label	Pass / Fix needed
Verify focus moves logically	Pass / Fix needed
Check text contrast and spacing	Pass / Fix needed

Submit

- GitHub repository URL
- Week 03 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 04 uses Flexbox and Grid to organise navigation, forms and card galleries.
