

Week 04 Project Lab - Layout Systems (Flexbox & Grid)

Start from: Week 03 produced forms and a basic visual design system.

Finish with: The website uses intentional layout systems for navigation, forms, cards and page sections.

Lab Goal

Manage one-dimensional and two-dimensional layouts for complex page sections.

Build Tasks

1. Convert navigation into a Flexbox row
2. Align form controls with consistent gap
3. Create a card gallery with CSS Grid
4. Use container width to improve readability
5. Remove manual spacing hacks

Key Code Reminder

```
.site-nav {  
  display: flex;  
  gap: 1rem;  
  align-items: center;  
}
```

Testing Checklist

Check	Result
Resize the browser width	Pass / Fix needed
Check navigation alignment	Pass / Fix needed
Inspect card gaps and wrapping	Pass / Fix needed
Confirm form labels align with controls	Pass / Fix needed

Submit

- GitHub repository URL
- Week 04 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 05 adapts these layouts for mobile, tablet and desktop using responsive design.
