

Week 06 Project Lab - JavaScript & DOM Interaction

Start from: Week 05 produced a responsive interface ready for interaction.

Finish with: The site responds to user actions using JavaScript, DOM selection and class changes.

Lab Goal

Add behaviour to a page by connecting programming logic to user actions via the DOM.

Build Tasks

1. Add DOM hooks to the navigation
2. Write an event listener for the mobile menu
3. Toggle a state class instead of inline styles
4. Add a simple theme or FAQ interaction
5. Test interaction with click and keyboard focus

Key Code Reminder

```
const menuButton = document.querySelector(".menu-toggle");
const nav = document.querySelector(".site-nav");
menuButton.addEventListener("click", () => {
  nav.classList.toggle("is-open");
});
```

Testing Checklist

Check	Result
Open the browser console	Pass / Fix needed
Click the menu several times	Pass / Fix needed
Check class changes in DevTools	Pass / Fix needed
Verify the site still works if JavaScript fails gracefully	Pass / Fix needed

Submit

- GitHub repository URL
- Week 06 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 07 strengthens forms with validation and stores lightweight choices in the browser.
