

Week 07 Project Lab - Advanced Forms & Storage

Start from: Week 06 added DOM interaction and state changes.

Finish with: The Plan a Trip form gives clearer feedback and remembers safe lightweight preferences.

Lab Goal

Implement client-side validation and persist lightweight user choices between browser sessions.

Build Tasks

1. Add custom validation messages
2. Prevent submission when required logic fails
3. Save theme choice or favourite destination IDs
4. Recover saved values on page load
5. Display clear feedback to users

Key Code Reminder

```
if (days < 1) {  
  showError("Trip length must be at least one day.");  
  return;  
}
```

Testing Checklist

Check	Result
Submit invalid values	Pass / Fix needed
Refresh the browser and check saved preferences	Pass / Fix needed
Clear storage and retest default state	Pass / Fix needed
Check storage does not contain private data	Pass / Fix needed

Submit

- GitHub repository URL

- Week 07 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

Next

Week 08 loads destination and event content from JSON using the Fetch API.
