

# Week 10 Project Lab - Web Storage

**Start from:** Week 09 identified usability and accessibility issues in the interactive site.  
**Finish with:** The site remembers non-sensitive user preferences and restores them predictably.

## Lab Goal

Persist lightweight user preferences between browser sessions.

## Build Tasks

1. Review current storage use
2. Store favourite destination IDs
3. Restore saved theme on page load
4. Handle missing or corrupted storage safely
5. Provide a clear reset option

## Key Code Reminder

```
const favourites = JSON.parse(localStorage.getItem("favourites") || "[]");  
favourites.push("rainforest-walk");  
localStorage.setItem("favourites", JSON.stringify(favourites));
```

## Testing Checklist

| Check                               | Result            |
|-------------------------------------|-------------------|
| Refresh and reopen the browser      | Pass / Fix needed |
| Inspect Application > Local Storage | Pass / Fix needed |
| Test corrupted data recovery        | Pass / Fix needed |
| Verify sensitive data is not stored | Pass / Fix needed |

## Submit

- GitHub repository URL
- Week 10 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

## Next

Week 11 strengthens data rendering and filters using the stored IDs and JSON content.
