

Week 11 Project Lab - Data Rendering

Start from: Week 10 persisted favourites and preferences using Web Storage.
Finish with: The site renders data-driven content more reliably and connects filters to the user interface.

Lab Goal

Load and render dynamic content from external data sources.

Build Tasks

1. Review the data shape
2. Write `renderCard()` for one item
3. Render all matching items
4. Add filter controls and empty states
5. Connect favourites to rendered cards

Key Code Reminder

```
const matches = destinations.filter(item =>
  item.name.toLowerCase().includes(query)
);
```

Testing Checklist

Check	Result
Search for a known result	Pass / Fix needed
Search for no result	Pass / Fix needed
Disable/rename the JSON file	Pass / Fix needed
Confirm the UI explains loading and errors	Pass / Fix needed

Submit

- GitHub repository URL
- Week 11 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note
