

## Week 12 Project Lab - UX & Testing

**Start from:** Week 11 completed dynamic data rendering and filter behaviour.  
**Finish with:** The site has documented quality evidence: validation, accessibility, responsiveness and performance checks.

### Lab Goal

Ensure the site is accessible, validated and optimized for performance.

### Build Tasks

1. Create a testing checklist
2. Validate HTML and CSS
3. Test keyboard navigation and focus
4. Run responsive and performance checks
5. Record fixes in a test report

### Key Code Reminder

```
// Test note example  
Expected: menu opens with keyboard.  
Actual: focus moves to first link.  
Result: Pass.
```

### Testing Checklist

| Check                                         | Result            |
|-----------------------------------------------|-------------------|
| Verify broken links                           | Pass / Fix needed |
| Check console errors                          | Pass / Fix needed |
| Run Lighthouse or manual accessibility checks | Pass / Fix needed |
| Retest after fixing problems                  | Pass / Fix needed |

### Submit

- GitHub repository URL
- Week 12 commit message or commit hash
- Screenshot of the completed feature
- 2-4 sentence test note

## Next

Week 13 deploys the production-ready website and prepares the final demonstration.
