

Week 13 Project Lab - Deployment & Release

Start from: Week 12 produced test evidence and fixed quality issues.

Finish with: The project is uploaded, documented, deployed and ready for final demonstration/code defence.

Lab Goal

Publish a production-ready website to a live public URL.

Build Tasks

1. Finish README and run instructions
2. Check final file paths and assets
3. Push final code to GitHub
4. Enable GitHub Pages
5. Prepare a user-journey-based demonstration

Key Code Reminder

```
git add .  
git commit -m "Week 13 final release"  
git push origin main
```

Testing Checklist

Check	Result
Open the public URL	Pass / Fix needed
Test navigation after deployment	Pass / Fix needed
Check console and missing assets	Pass / Fix needed
Trace final features back to Week 01 user stories	Pass / Fix needed

Submit

- GitHub repository URL
- Week 13 commit message or commit hash
- Screenshot of the completed feature

- 2-4 sentence test note

Next

Final demo and code defence: explain how the project satisfies the original user stories.
